

# Challenges of freelancer management

Decentralized management of contact data

Lack of budget control

Unclear communication

Individual workflows

- ✗ Managing budgets across multiple projects can be confusing.
- ✗ Decentralized management of contact data for freelancers with whom work has already been done prevents a smooth workflow.
- ✗ Each department manages work with freelancers independently—this is inefficient.

Solution

- ✓ An overview of expenses simplifies budget control.
- ✓ Easily contact and communicate with freelancers from past or future projects.
- ✓ Cross-departmental collaboration in coordinating freelancers leads to greater efficiency.

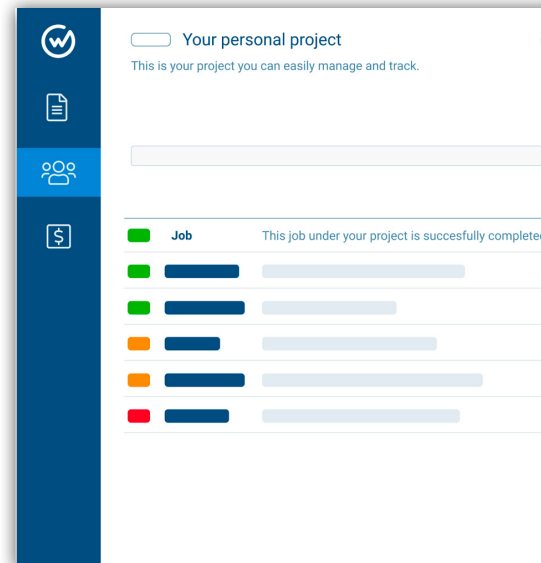

4 hours of expenditure for 40 hours of freelance work

30 minutes of expenditure regardless of project size

## WorkGenius Solution

Our AI-driven technology simplifies project management and communication with freelancers.

- Our dynamic budget overview allows for detailed financial planning and control.
- We provide an overview and evaluation of freelancers from past projects.
- Our technology can be used across departments for different projects and budgets.
