

# Challenges of finding freelancers

- ✗ Time that would typically be allocated towards high-level core tasks is reduced due to the freelancer search process.
- ✗ Difficulty objectively evaluating skills prior to working with a new freelancer.
- ✗ Personnel-relevant decisions cannot be outsourced, which ties up internal capacities.

## Solution

- ✓ An overview that contains all suitable freelancers at a glance.
- ✓ The freelancers' skills are objectively evaluated based on past project rating performance.
- ✓ The freelancers' availability is automatically coordinated in advance.
- ✓ The maximum budget can be set when the project is completed.

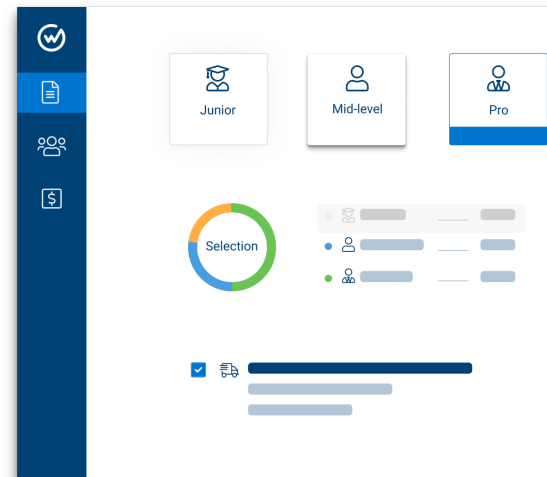

**5 hours of expenditure** for 40 hours of freelance work

**15 minutes of expenditure** regardless of the project size

## WorkGenius Solution

Our AI-driven technology finds the most qualified freelancers for your projects through automated, skill-based matching.

- We provide access to vetted freelancers (identity & skills).
- We find the most suitable freelancer for all projects based on artificial intelligence.
- Our technology automatically checks each freelancer's availability.
- We offer the option to set a maximum compensation when creating a brief.
